MAKE EVERY MINUTE COUNT

A well-prepared coaching session is worth three improvised ones. These forms exist so that you arrive with **data**, not impressions, and leave with **decisions**, not good intentions.

THE 15-MINUTE PRE-SESSION RITUAL

01 Fill in the form the night before

Not in the five minutes beforehand. You need to go through the week's actual log calmly.

02 Score honestly

A sincere 6 is infinitely more useful than a polite 9. Nobody can help you fix what you hide from them.

03 Prioritise your three questions

Write them in order of importance. If there were time for only one, which would it be?

04 Bring numbers, not feelings

«I felt flat» is not much use. «I dropped from 100 to 92.5 kg on bench press and averaged 5.5 hours of sleep» is very useful.

05 Write down the agreements during the session

What is not written down does not get done.

HOW THE 4 WEEKS ARE STRUCTURED

WEEK	FOCUS	THE QUESTION THE SESSION ANSWERS
Week 1	DIAGNOSIS	Where exactly am I, and what is holding me back?
Week 2	ADJUSTMENT	What specific change do I make, and how do I measure whether it works?
Week 3	INTENSIFICATION	Where can I push harder without breaking recovery?
Week 4	CONSOLIDATION	What do I take from the month, and how do I keep it?

DATA TO HAVE AT HAND FOR EVERY SESSION

NUTRITION

- Average actual calories and protein
- Days met out of 7
- Weekly average weight and waist measurement

TRAINING AND RECOVERY

- Sessions completed and main loads
- Average hours of sleep
- New aches or pains

30 QUESTIONS WORTH ASKING

If you do not know what to ask, pick from here. Tick the ones you want to take to your next session.

NUTRITION

- ☐ Do my current calories fit my goal, or am I being too aggressive?
- ☐ How do I adjust macros on days I cannot train?
- ☐ What do I do when I eat out several days in a row?
- ☐ Am I eating enough protein for the training volume I am doing?
- ☐ Is carb cycling worth it in my specific case?
- ☐ How do I handle a weekend with a social event without wrecking the week?
- ☐ How long should I keep this deficit before a maintenance phase?
- ☐ Has my weight stalled because of adaptation, or because I am measuring badly?

TRAINING

- ☐ Is my weekly volume per muscle group right for my level?
- ☐ Am I progressing at a good rate on the main lifts?
- ☐ Which exercise should I swap out because of this particular discomfort?
- ☐ How do I know if I am training too close to failure?
- ☐ Should I change programme or stay on this one longer?
- ☐ How much cardio can I add without compromising strength?
- ☐ How do I structure the week if I can only train 3 days?
- ☐ Is my technique on this lift correct? (bring video)

RECOVERY AND HABITS

- ☐ Do I need a deload week right now?
- ☐ How do I improve my sleep with my current work schedule?
- ☐ What do I do on days I arrive at the gym with no energy?
- ☐ Is the level of soreness I have normal?
- ☐ How do I manage weeks with heavy work stress?
- ☐ Should I add mobility or core work?

SUPPLEMENTATION AND STRATEGY

- ☐ Is any new supplement worth it in my situation?
- ☐ Am I taking creatine correctly?
- ☐ What takes priority if my budget is limited?
- ☐ What is a realistic expectation of results at 3 and 6 months?
- ☐ Which metric should I watch more, and which one is distracting me?
- ☐ Am I on the right track, or am I fooling myself with the data?
- ☐ What would you recommend if I could change only one thing this month?
- ☐ What is the logical next step when this block ends?

ONE GOAL, THREE HABITS

More than three new habits at once has an enormous failure rate. Pick the three that move the needle most and protect them above everything else.

WHERE EVERY NUMBER COMES FROM

Every number in this document comes from sources that are public, free and checkable. Not one figure is invented, rounded for convenience or copied from another popular publication. This page exists so that you can verify it yourself.

WHY THESE SOURCES AND NO OTHERS

Works of the United States federal government are not subject to copyright (17 U.S.C. § 105). That makes a handful of agencies the only source of nutrition and training data that is both first-rate and legally free. This is not restricted material: it is public material that almost nobody opens.

WHAT YOU ARE LOOKING FOR	WHAT YOU WILL FIND	WHERE
Reference intakes	RDA, AI and tolerable upper intake level for every vitamin and mineral	ods.od.nih.gov
Food composition	The full profile of any food, nutrient by nutrient	fdc.nal.usda.gov
Dietary guidelines	Dietary patterns and limits for added sugars, saturated fat and sodium	health.gov
Physical activity guidelines	The weekly dose, its response curve and the strength requirement	health.gov
Physical readiness doctrine	FM 7-22: training, nutrition, sleep and mental readiness	armypubs.army.mil
Lifting equation	How much weight is reasonable to lift in each specific situation	cdc.gov/niosh
Food safety	Safe internal temperatures and the danger zone	foodsafety.gov
Health claims	What may legally be claimed about a nutrient in Europe, and what was refused	European Commission register

HOW THIS DOCUMENT CHECKS ITSELF

The reference figures are not typed by hand: they live in a data module that the typesetting program verifies before writing a single line. It checks that the macronutrient ranges can add up to one hundred per cent of energy, that none of the 19 micronutrients has a recommended value above its own ceiling without a note explaining why, and that no safe cooking temperature falls inside the danger zone. If a single check fails, the document is not typeset.

REFERENCE VALUES ARE POPULATION VALUES

They describe what covers the needs of most healthy adults. They are not an individual prescription, they do not account for disease, pregnancy, breastfeeding or medication, and no publication replaces assessment by a registered health professional. If you take medication, some of the nutrients named here interact with it in clinically relevant ways: do not change an intake or start a supplement without telling whoever prescribes for you.

THE SIX FRONTS OF A MONTH DONE WELL

FRONT	WHAT IT DECIDES	HOW OFTEN
Structured strength	Measurable progression on the main movements	The whole block
Metabolic work	Work capacity and complementary expenditure	2-4 times a week
Nutritional base	Energy, protein and the quality of the pattern	Daily
Night-time rest	Everything above consolidates here, or it does not consolidate	Every night
Head and focus	Adherence, stress management and getting back after a slip	Daily
Review with data	What stays, what gets adjusted and what gets dropped	Once a week

THE WEEKLY SESSION IS WHAT JOINS ALL SIX

You can handle each front well on its own and still not move forward, because the one that fails drags the rest with it. The weekly session exists to look at all six at once and decide **which one needs changing** — and it is almost never the one you thought.
